Powered by Kinect sensor technology.

Use your body movements to control hovercraft and character.

## Let's Go Hunt for Treasure!

- Uses Kinect technology to detect motion of players
- Single player game with linkable capability for 2-player cooperative play
- Vivid graphics displayed on a 55" monitor

## How to Play

Powered by Kinect sensor technology, use body and hand movements to control characters on screen. Progress through 3 stages and collect treasure to earn points along the way while avoiding obstacles.
